COMMISSION

## Hyannis Parking Assessment

*Observations and Analysis of Downtown Parking for  
the Town of Barnstable*

November 2013

Per a request from the Town of Barnstable, Cape Cod Commission (CCC) staff have performed parking occupancy counts at selected locations (see following locus map) in Hyannis during the following periods:

Weekday Morning

10 a.m., Thursday, August 15, 2013

Weekday Afternoon

2 p.m., Thursday, August 15, 2013

Weekday Evening

7 p.m., Tuesday, August 27, 2013

Weekend Morning

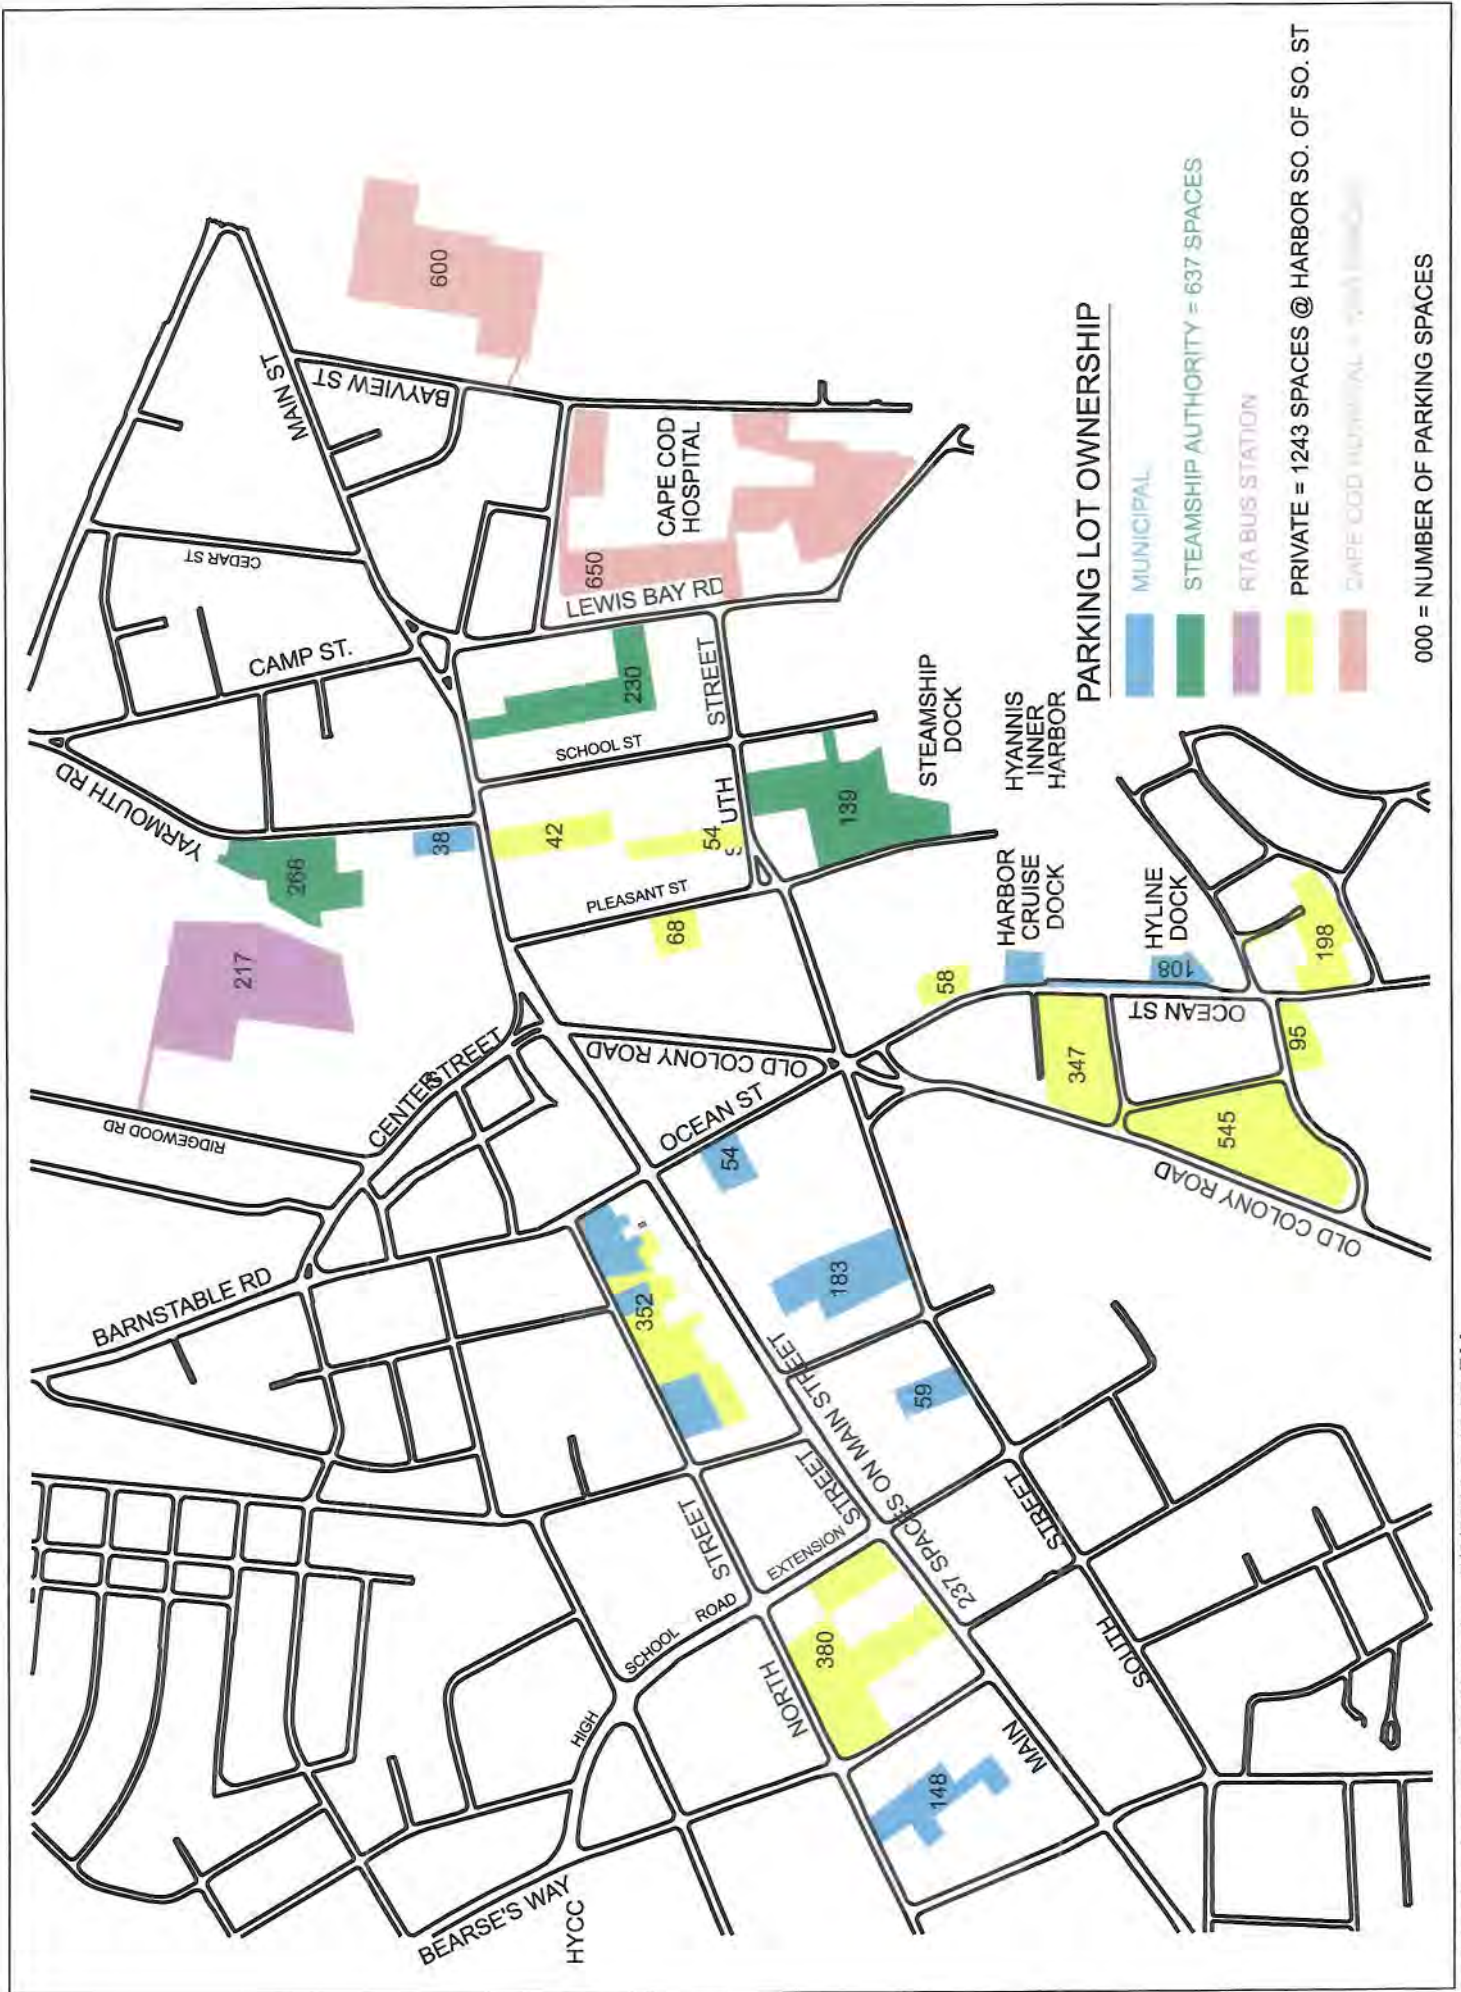

10 a.m., Saturday, August 17, 2013

The table on the following page contains a summary of the occupancy rates at the selected parking areas. The rates have been color-coded to reflect relative parking availability as follows:

Range of Rates	Color Code	Parking Availability
0 – 0.75	Green	Available
0.75 – 0.85	Yellow	Constrained – some vehicles circulating
0.85-1.0	Red	At or above “effective” capacity
>1.0	Purple	Above physical capacity

The color coding is for reference and generally reflects industry guidelines. Effective capacity is usually considered to be in the range of 0.80-0.85. Providing parking availability at or under this range means a space is generally available for a motorist seeking to park in a particular location and avoids the extra traffic created by motorists circulating in the street network looking for traffic.

The last four pages of this report contain the individual data collection sheets for each set of observations. Details include the actual number of parked vehicles, empty spaces, illegally parked cars (usually outside of marked spaces) as well as the hour/minute when the observations were made.
